

Brainstorming & Idea Prioritization Template

Date	1 October 2026
Team ID	SWTID-2026-3594
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Aaruth K S	Script-controlled READ ACL that checks the Branch field of each record before allowing access	Security	1
2	A Agasi Idhaya	Create custom roles bb1, bb2, bb3 and bb4 so every operation (read, create, write, delete) has its own role	Role Management	2
3	Ahilan S	Build a custom table "Institution Details" (u_institution_details) with a Branch choice field (ECE, EEE, CSE)	Data Model	3
4	Ashok Kumar K Y	Add separate CREATE, WRITE and DELETE ACLs, each gated by one role and no data condition	Security	2
5	Ashrafulla S	Verify every ACL by impersonating the EEE User, a user without roles, and the Admin	Testing	4
6	Aaruth K S	Keep an admin bypass in the ACL script (gs.hasRole('admin')) so administrators retain full access	Security	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Script-controlled READ ACL with Branch is EEE data condition, role bb1 and admin bypass	High	High	1	Yes
2	Operation-wise CREATE / WRITE / DELETE ACLs mapped to roles bb2, bb3 and bb4	High	High	2	Yes
3	Custom table u_institution_details with sample records for ECE, EEE and CSE	High	Medium	3	Yes
4	Impersonation-based verification of each ACL	High	High	4	Yes
