

Empathy Map

Date	1 October 2026
Team ID	SWTID-2026-3594
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS "Why can I see records from every branch?" "I only need the EEE branch records." "Who gave me permission to edit and delete?"		THINKS "Sensitive student data should not be open to everyone." "Each action should need its own role." "Admins must still be able to see everything."
	EEE USER <i>(Role / User Type: Branch user with roles bb1 - bb4)</i>	
DOES - Logs in to the ServiceNow instance - Opens the Institution Details list - Tries to create, edit or delete records		FEELS - Uncertain when records of other branches appear - Confident when only EEE records are shown - Relieved that rights are separated by role
