

Data Flow Diagram

Date	1 October 2026
Team ID	SWTID-2026-3594
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Administrator).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Evaluate ACL, Apply Data Condition).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Users & Roles, Access Controls, u_institution_details).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below shows how these symbols come together for the script-controlled ACL in ServiceNow.

Level-1 Data Flow Diagram: Script-Controlled ACL (ServiceNow)
