

Code-Layout, Readability and Reusability

Date	1 October 2026
Team ID	SWTID-2026-3594
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development. In this project the code consists of the ServiceNow ACL scripts and the configuration of roles, table and ACL records.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	ACL script uses 4-space indentation
2	Proper File Structure	Files and folders are logically organized	Yes	One ACL record per operation on u_institution_details
3	Meaningful Variable Names	Variables reflect their purpose clearly	Partial	Script has no variables; roles bb1 - bb4 are short codes
4	Function / Method Names	Functions are descriptively named	Partial	Script is one anonymous function wrapper
5	Code Comments	Inline and block comments explain logic	Yes	Each condition has a comment line
6	Modular Design	Code is split into reusable functions/modules	Yes	Read, Create, Write and Delete are separate ACLs
7	No Redundant Code	Duplicate or unused code is removed	Yes	No unused branches in the script
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Default is return false (deny access)

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Admin-bypass ACL script pattern	JavaScript (ServiceNow server-side)	Any table ACL	High
2	Role-per-operation design (bb1 - bb4)	ServiceNow Roles and ACLs	Other custom tables	High
3	Data condition (Branch is EEE)	ServiceNow ACL condition builder	Other branches such as ECE, CSE	Medium

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
4	Custom table u_institution_details	ServiceNow Tables	Other institution datasets	Medium
5	Impersonation test procedure	ServiceNow platform feature	Any future ACL testing	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Clear separation of the four operations
Readability	4	Short script with comments
Reusability	4	Pattern can be copied to other tables
Documentation / Comments	4	Project steps documented milestone-wise
Overall Score	4	Compact, maintainable, easy to extend
