

Project Executable Files

Date	1 October 2026
Team ID	SWTID-2026-3594
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders): ACL script and configuration	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files: table u_institution_details and sample records	Yes
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (ServiceNow instance URL)	Pending
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Pending
10	Demo video or walkthrough (if required)	Pending

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Script-Controlled-ACL/

- 1. Brainstorming & Ideation/
- 2. Requirement Analysis/
- 3. Project Design Phase/
- 4. Project Planning Phase/
- 5. Project Development Phase/
- 6. Project Testing/
- 7. Project Documentation/
- 8. Project Demonstration/

ServiceNow configuration (on the instance)

- User: EEE User
- Roles: bb1, bb2, bb3, bb4
- Table: u_institution_details (Institution Details)
- ACLs: read (script + Branch is EEE), create, write, delete

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[Paste your ServiceNow instance URL]
Login Credentials (Demo)	User ID: EEE User Password: [Provide demo password for evaluator access]
Platform / Hosting Provider	ServiceNow Personal Developer Instance (developer.servicenow.com)
Repository Link	
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project:

1. Log in to the ServiceNow instance with admin access.
2. Open User Administration → Users and check the user EEE User; open Roles and check bb1, bb2, bb3 and bb4.
3. Open the Institution Details list by typing u_institution_details.list in the application navigator filter.
4. Open System Security → Access Control (ACL) and review the four ACLs on u_institution_details.
5. Impersonate EEE User and open the list: only EEE branch records are visible.
6. Impersonate the Admin and open the list: all branch records are visible.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	security_admin role must be elevated before ACLs can be created	Elevate the role from the user menu before creating ACLs
2	The Personal Developer Instance goes to sleep after inactivity	Wake the instance from the developer portal before testing
3	Roles bb1 - bb4 are short codes and are not self-explanatory	Document their purpose in each role description
